

Lifecycle Management

- Has a Business-Critical Contract Elapsed?
- Have Mergers & Acquisitions Added Assets with no Documentation or Oversight?
- Has Employee-Purchased Software led to Duplicate Licenses & Contracts?

An Experienced IT Lifecycle Manager will take care of it all:

Our lifecycle management team is dedicated to helping you consolidate, co-term & keep track of renewals or refresh recommendations for your environment that consist of but is not limited to VMware, Dell, Microsoft, Adobe, HP, & Cisco. All pertinent information is uploaded into our internal database which allows our experienced team to monitor & proactively send renewal notices 90 days in advance of expiration.

- Complete Asset Management – tracking & management of all hardware, software & license contracts from acquisition to retirement
- 90/60/30 day renewal notices sent to clients
- Consolidation of all contracts to a common date to meet our clients budget terms
- Assistance determining refresh cycle to meet business objective & future budgeting
- Ensure all data on contracts are registered correctly

IT Lifecycle Management gives you:

- An experienced management team that has managed assets for Fortune 500 clients
- Single-source IT oversight of hardware & software assets
- Auto-renewal of subscriptions & licenses
- Lifetime asset management with analytics for repair/replace decisions
- Product purchase tracking through **NAKA** LCM team to streamline procurement
